APPENDIX

PREFIXES.

refix is a significant particle placed before a word, or a root, in order to modify its meaning. As the constituent part of a word, a prefix can be readily separated The prefixes, fully explained, will be found in the body of the work in regular alphabetical order.

POSTFIXES.

ostfix is a significant particle placed after a word, or a root, to modify its meaning. Note. - There are many postfixes or terminations which are not significant, but simply paragogical—that is, they are letters or syllables without meaning, and merely serve to lengthen the words. The postfixes are placed in groups according to their signification, but are, at the same time, for the convenience of reference, arranged in strict alphabetical order, cross-references being made to the heading under which they will be found. The language from which they are derived, with the particular form in which they occur in that language, as far as can be ascertained, is placed after each, or after the heading of a group when such differs in its origin from the others. In the examples given, the root-parts of the words are printed in black type, and the postfixes in italics. The meanings given are so literal as to include fully the meanings of the postfixes.

APPENDIX IV.

OMPLETE LIST OF SCRIPTURE PROPER NAMES, WITH THE WHOLE PROPER NAMES FOUND IN THE APOCRYPHA; ALSO, A SELECTION OF COMMON, HISTORICAL, AND CLASSICAL NAMES, PHONETICALLY RESPELT FOR PRONUNCIATION.

.—The Scripture Names have been taken afresh from the Common English Version. In placing the accents, and dividing the words into syllables, the authority of Smart and Dr Smith has been chiefly followed. A few names not found must be sought for in the Dictionary. Where there are two or more accents placed on a word or its respelling, the strong accent is marked thus ("), and the weak accents thus (:). The marks (-), ('), (^) over the vowels do not refer to quantity as in Greek or Latin, but merely indicate the quality of the sounds to be given to the vowels: see note above scheme of phonotypes.

APPENDIX IV.

A COMPLETE LIST OF SCRIPTURE PROPER NAMES, WITH THE WHOLE PROPER NAMES FOUND IN THE APOCRYPHA; ALSO, A SELECTION OF COMMON, HISTORICAL, AND CLASSICAL NAMES, PHONETICALLY RESPELT FOR PRONUNCIATION.

Note.—The Scripture Names have been taken afresh from the Common English Version. In placing the accents; and dividing the words into syllables, the authority of Smart and Dr Smith has been chiefly followed. A few names not found must be sought for in the Dictionary. Where there are two or more accents placed on a word or its respelling, the strong accent is marked thus ('), and the weak accents thus ('). The marks (-), (-), (') over the vowels do not refer to quantity as in Greek or Latin, but merely indicate the quality of the sounds to be given to the vowels: see note above scheme of phonotypes.
